

**WOOD WASTE ELIGIBILITY ASSESSMENT SHEET**

**CATEGORY 6: wood waste from plantations [regulation 8(6)]**

**Box A: location and land use history (compulsory for all applications)**

Location where plantation wood waste was sourced (list area, coupe name and mapping grid references)
--

Identify (or estimate if necessary) the year in, or period over, which native vegetation was last cleared from the site	
---	--

Note: naturally occurring native vegetation includes all vegetation that is native to Australia (for example, native grasslands, native forest and regrowth native vegetation) but not existing plantations of native species or agricultural land.

**Planning approval processes [regulation 8(6)(a)(i)]**

<b>Box B: <i>Sourcing wood waste from State or privately owned plantations</i></b>		
Was the harvesting approved	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Attach copy of relevant harvesting approval		
Date harvesting approved:		
Date harvesting occurred:		

**Management codes of practice [regulation 8(6)(b)(i)]**

<b>Box C Option 1</b>		
Was the harvesting conducted in accordance with the relevant approved code of practice*	<input type="checkbox"/> Yes	<input type="checkbox"/> No
If yes, attach proof		

*\*approved code of practice means code of practice approved under regulation 4B of the Export Control (Unprocessed Wood) regulations, in place in WA, SA, Tas, Vic, NSW and ACT.*  
 OR

<b>Box C Option 2</b>		
Attach proof of external certification against the Environmental Management Standard ISO 14000		

**Financial value test [regulation 8(6)(a)(ii)]**

Instructions for valuing wood waste:

Attach certification (by a third party where possible) that no higher value could have been obtained from the product sold for electricity generation and that that product sold for electricity generation is a waste from a harvesting operation producing other wood products (eg sawlogs).
